## SUBDIVISION REVIEW PROCEDURE

### Definition, LDC, Section 6.01.01:

A “Subdivision” is the division of a parcel of land for the purposes of sale, lease, rental, conveyance of title or any use (including cemeteries), regardless of whether by gift, or exchange of currency or other items of value, into two (2) or more parcels where:

1. Any one of which is less than four and a half (4.5) acres in size; or
2. Any one of which is ten (10) acres in size or less, when any new street or roadway is installed (private or public); or
3. A parcel of any size which requires, or is requested by an applicant, to create a dedication of a new street through the platting process.

### General Provisions:

A parcel of land may not be divided into two (2) or more parcels if it is defined as a “subdivision” in accordance with LDC, Section 6.01.01, unless a plat has been filed and approved by the County.

The division of land into parcels, all of which are four and a half (4.5) acres in size or larger, and where the parcels are served by an existing private, County, state, or federal roadway, meeting the roadway improvement standards of the LDC (including paving at the time of division), shall be defined as a “property division” and not required to plat. Property divisions must comply with development plan review requirements in accordance with LDC, Section 10.02.00.

### Procedure:

#### 1. Pre-application Review:

- a. The subdivider should consult early with the Planning Department, the Florida Department of Environmental Protection, the Northwest Florida Water Management District, and other pertinent agencies for advice and assistance.
- b. The subdivider shall present sketch plans, data containing existing conditions with the site, and in its vicinity, and provide a proposed layout (with any development) of the subdivision for review.
- c. Minor subdivisions, as defined in LDC Section 10.02.03.C., may be reviewed through an abbreviated procedure in which the preliminary and final plat are submitted concurrently.
- d. All plats must comply with the requirements of Chapter 177, Florida Statutes.

**Following a satisfactory pre-application review, the Planning Department will advise the applicant on submission and development classification, and platting requirements.**

#### 2. Preliminary Plat Approval:

- a. Applicants should complete a Subdivision Application to request review and approval of a proposed subdivision and include the preliminary platting application fees. Fees are based on the number of lots.
- b. Applicants should submit preliminary plat documents and a signed and sealed boundary survey in accordance with LDC Section 10.02.02.

- c. Applicants will coordinate with the Planning Department regarding the Development Review Committee (DRC) review of the subdivision application and civil and site plans.
- d. Once the DRC review is complete, and all concerns are addressed by the Applicants, the Planning Department will schedule a Neighborhood Information Meeting (NIM) and complete all public noticing (mailing letters to all property owners within 1,500 feet; newspaper advertising; signage). The NIM will be held prior to the scheduled Planning Commission meeting.
- e. The Planning Department will schedule a Planning Commission meeting, which Applicants should plan on attending.

### **3. Initiation of Physical Improvement Installation:**

Upon preliminary approval by the Planning Commission, the subdivider shall proceed with final plat review.

### **4. Final Plat Approval:**

Upon completion of the physical development of the subdivision or otherwise satisfying the conditions of LDC Section 10.02.02, the subdivider shall proceed with final plat review and approval.

- a. Applicants should complete a Subdivision Application to request review and approval of a proposed subdivision and include the final platting application fees. Fees are based on the number of lots.
- b. Submit the Final Plat with signed certifications in accordance with LDC Section 10.02.02.
- c. Applicants will coordinate with the Planning Department regarding the Development Review Committee (DRC) review of the subdivision application and civil and site plans.
- d. Once the DRC review is complete, and all concerns are addressed by Applicants, the Planning Department will schedule a Neighborhood Information (NIM) and complete all public noticing (mailing to all property owners with 1,500 feet; newspaper ads; signage). The NIM will be held prior to the appropriate scheduled Planning Commission meeting.
- e. The Planning Department will schedule a Planning Commission meeting, which Applicants should plan on attending. For Minor Subdivisions and property divisions of less than 10 lots that are not exempt from subdivision and platting requirements, the Planning Commission may make a final determination.
- f. For Major Subdivisions, the Planning Commission will make a recommendation.
- g. The Board of County Commissioners of Washington County make the final determination regarding Major Subdivisions (10 or more lots) within the unincorporated County. The councils of Caryville, Ebro, Vernon, and Wausau will make the final determination for subdivisions within city/town limits.
- h. The final plat application and plat must include a resolution.

### **5. Recording of Final Plat:**

Upon approval of the final plat, the subdivider must have the Final Plat recorded in the Office of the Clerk of Circuit Court within sixty (60) days of approval.

- a. No changes, erasures, modifications, or revisions shall be made in any subdivision plat after final approval has been given and endorsed in writing on said plat (except for notations with regard to vacations (see Section 6.03.04., LDC)).
- b. In the event that any subdivision plat, when recorded, contains any changes, the plat shall be considered null and void, and the Planning Commission shall then file a correct plat as approved, noting the reasons for such filing. Any erasures made on a plat prior to its signing shall be initialed and dated by the Chairman of the Washington County Planning Commission at the time of signing.
- c. Upon application by the subdivider, the Planning Commission may make a reasonable extension of the approval provided, however, the Planning Commission may require the layout be revised according to any change in regulations or ordinance applicable to the layout subsequent to the first approval.
- d. Expiration of an approval shall mean that any further action will require a new filing fee as well as a review of all previous findings. Final plats not recorded within sixty (60) days of the date of approval shall become null and void and a new application shall be required to be submitted to the Planning Department.
